

Certificaat

Workflow Engineer

Dit certificaat werd toegekend aan:

Peter Nagy

Training: Workflow Engineer

During the training, the participant has successfully demonstrated knowledge and skill in the following topics:

- Visualizing business processes using the GOLE method
- Improving business processes by eliminating waste and streamlining business logic
- Implementing workflow software by developing process- and data models

This enables the participant to independently visualize, improve, and sustain business processes using blockchain-driven workflow software.

Certificaat nr: 5b29e993-4267-492d-ade2-1c1f36384a67
