

Certificaat

Workflow Engineer

Dit certificaat werd toegekend aan:

Aung Kaung Myat

Training: Workflow Engineer

During the training, the participant has successfully demonstrated knowledge and skill in the following topics:

- Visualizing business processes using the GOLE method
- Improving business processes by eliminating waste and streamlining business logic
- Implementing workflow software by developing process- and data models

This enables the participant to independently visualize, improve, and sustain business processes using blockchain-driven workflow software.

Certificaat nr: ee453fc6-0849-473c-a9f4-7c2d689704a5
